

Valley Center Community Trails and Pathways Plan

Trails: The Community Connection

The Community Trails Master Plan will be utilized to develop a system of interconnected regional and community trails and pathways. These trails and pathways are intended to address an established public need for recreation and transportation, but will also provide health and quality of life benefits associated with hiking, biking, and horseback riding throughout the County's biologically diverse environments.

Community trails serve a different function than regional trails, which are focused on the provision of long linear distances. Instead, community trails are "local public facilities" in close proximity to residents that provide transportation, recreation, access, infrastructure, linkages and safe routes throughout a community. The Community Trails Master Plan (CTMP) involves both trail development and management on public, semi-public and private lands. The CTMP has established two forms of non-motorized facilities called "Trails" and "Pathways" that provide passive recreational, and alternative modes of transportation.

Trails are typically away from vehicular roads that are primarily recreational in nature but can also serve as an alternative mode of transportation. They are soft-surface facilities for single or multiple uses by pedestrians, equestrians, and mountain bicyclists.

Pathways are a non-motorized transportation facility located within a parkway or road right of way. A riding and hiking trail located in the road right of way is considered a pathway. They are soft-surfaced facilities intended to serve both circulation and recreation purposes. Pathways help make critical connections and are an integral part of a functional trail system.

COMMUNITY TRAIL STATEMENT

A primary goal of the community is to establish a comprehensive community trail and pathway system for non-motorized, multi-modal travel and recreation within the Valley Center Community Planning Area that provides connectivity to the Village Core, to public facilities such as schools and

parks, to adjacent communities, and to regional trails.

Within Hellhole Canyon Open Space Preserve, there are approximately fourteen miles of trails currently in use. Hellhole Canyon is not in the Valley Center Community Park and Recreation District boundaries. Outside of Hellhole Canyon, there are no existing trails in Valley Center; however, there are numerous offers of dedication and I.O.D.s (Irrevocable Offers of Dedication) for trail easements at various locations throughout the planning area. These IODs are not connected and are short pieces of trail dedications all over Valley Center with no continuity and are generally not useable

The Valley Center Trails Association (VCTA) is an independent non-profit organization that works in coordination with the Valley Center Parks and Recreation District (VCPRD) to promote the provision of trails in the planning area. In May 2000, the Valley Center Community Planning Group approved a draft trail plan, based on public rights-of-way that are intended to be incorporated into the Community Trails Master Plan. Refer to the Valley Center Community Trails map for specific details.

Current plans for Valley Center trails include:

- Valley Center Road improvement
Phases I and II will include pathways.

- A 1.3-mile “Demonstration Trail” around the Valley Center Community Services District (VCCSD) property located at the intersection of Lilac Road and Valley Center Road, near the Community Hall. This “Demonstration Trail” is intended to function as a prototype for future trails in Valley Center. The construction of this trail is pending appropriate funding.
- An important aspect of the Community trail plan is developing a connection to Daley Ranch in the City of Escondido.

THE NEED FOR TRAILS

The community trail needs are based on an equation established by the Trails System Assessment (TSA) in 2001, which identified a minimum baseline level of service for each community by population. The Baseline Level of Service or Trail Need is 0.8 miles of trail per 1,000 people.

The “Trail Need” is the minimum length of trail miles (baseline level of service) for each Community and Subregional Plan Area. The TSA calculations for community trail needs are as follows:

- **Trail Need** = (Community Population /1,000 residents x 0.8 miles of trails)
- **2000 Trail Need** = (2000 population /1,000 residents x 0.8 miles of trails)
- **2020 Trail Need** = (2020 population /1,000 residents x 0.8 miles of trails)

Population statistics from the 2000 U.S. Census were used to determine the current trail needs in Valley Center. Based on the census, the population of the Valley Center Community Plan Area is 15,653 and there is a current need for 13 miles of community trails. In the year 2020, the population is projected to increase to 40,680 and there would be a future need for 33 miles of community trails.

For additional information about the baseline level of service and trail needs, please refer to the discussion under “**The Need for Trails**” and **Tables NT-1 and NT-2** in the CTMP.

COUNTYWIDE TRAIL GOALS AND POLICIES

The “**Countywide Goals and Policies**” contained in the CTMP apply to all community and sub-regional plan areas. Community-specific goals and policies are intended to accommodate specific needs and they will be implemented when feasible.

The Valley Center Community Planning Group developed Community Specific Goals and Policies for their community trails plan. The abbreviations are as follows:

SG = Community Specific Goal

SP = Community Specific Policy

Goal: SG 1

The establishment of a comprehensive community trail and pathway system for

non-motorized, multi-modal travel and recreation within the Valley Center Community Planning Area that provides connectivity to the Village Core, to public facilities such as schools and parks, to adjacent communities, and to regional trails.

Goal: SG 2

Pathways may form the backbone of the community trail system, and should be coordinated with local trails in order to provide connectivity.

Goal: SG 3

Pathways should be considered when critical staging areas or trails systems cannot use a conventional trail, and should be located along important local roads where feasible.

Policy: SP 1

On existing roads, new priority 1 pathways will have fencing or barriers between the traveled portion of the road and the pathway in cases where parkway widths are 15 feet or greater.

Policy: SP 2

For new road construction, all Valley Center pathways shall be Type D Special as per the County Design Guidelines.

(NOTE: 15 feet right-of-way is the minimum easement width for Pathway Type D Special for safety and maintenance)

Where Community-specific goals and policies are not addressed, the “**Countywide Goals and Policies**” contained in CTMP shall apply.

DESIGN AND CONSTRUCTION GUIDELINES

Countywide trail guidelines in the Community Trails Master Plan apply to all community and sub-regional plan areas. Community-specific guidelines are intended to accommodate specific community needs and they will be implemented when feasible. Where Community specific guidelines are not addressed, the Countywide “**Design and Construction Guidelines**” contained in the CTMP shall apply.

VALLEY CENTER COMMUNITY TRAIL IMPLEMENTATION INFORMATION

The Valley Center Community Services District currently operates various park facilities within the Valley Center Community Services District currently operates various park facilities within the Valley Center Community. The district has expressed an interest in partnering with the County, through written agreement, for the construction and maintenance of community trails and pathways. This partnership could also facilitate grant applications and trail easement dedications.

The Valley Center Community Planning Group developed implementation strategies

for their community trails plan. The abbreviation is as follows:

SIS = Community Specific Implementation Strategies

Implementation Strategy: SIS 1

Community will encourage funding mechanisms to supplement County resources for the acquisition, construction, maintenance, and operation of community trails and pathways".

Implementation Strategy: SIS 2

Establish funding mechanisms for the acquisition, construction, maintenance, and operation of community trails and pathways.

Implementation Strategy: SIS 3

Community will encourage and support school districts and other public entities to obtain additional funding sources in order to acquire and construct trails and pathways.

Implementation Strategy: SIS 4

Community will support the active participation of trail advocacy groups and other volunteer organizations in fundraising for trails acquisition, construction, maintenance and operations.

Implementation Strategy: SIS 5

Encourage a partnership between San Diego County and the Valley Center Parks and Recreation District in order to facilitate grant

applications and trail easement dedications. This partnership would be subject to an operating agreement whereby the Valley Center Parks and Recreation District would be responsible for the construction and maintenance of local trails and pathways.

Implementation Strategy: SIS 6

Coordinate with land trusts, open space preserve organizations, and private developers in order to acquire sufficient land to meet the county's community trails goal.

Implementation Strategy: SIS 7

Support the County in minimizing public right-of-way infringements.

VALLEY CENTER COMMUNITY TRAILS MAP SUMMARY

As a result of the community trails outreach process for development of the CTMP, the Valley Center Community Planning Group completed several tasks, and prioritized community trails and pathways as well as their special features. Each trail and pathway was labeled and recorded producing a community trails map and index.

Proposed trails shown on trails maps contained in the Community Trail Master Plan depict corridors of general alignments. The term "general alignment" is used to describe the general location of a future trail within a designated corridor so that the specific alignment can be determined during the review and approval process when a

discretionary application is submitted for a development permit for land that includes a trail corridor. The designated corridor is approximately one-quarter mile wide. A general alignment is useful because it allows the trail to be located to avoid extreme topographical conditions, sensitive habitat or other site-specific constraints.

VALLEY CENTER COMMUNITY TRAILS MAP INDEX

The following community trails map index was completed by the Valley Center Community Planning Group and will be used as a reference tool.

COUNTY TRAILS PROGRAM
COMMUNITY TRAILS MASTER PLAN

VALLEY CENTER TRAILS MAP INDEX

Trail #: 1	USGS Quad(s): 82	Name: Valley Center Trail	Trail Status: () Existing (x) Proposed	Trail Priority Criteria: Essential to community character. Historic significance. Large user population. Significant health, safety and transportation benefits. Helps form a large loop trail.	Special Features: 1. Connectivity to Village Core. 2. Commercial areas and Parks and Recreation Land. 3. Potential future staging area: process for widening this road has begun. ROW being acquired at this time.
		Connections:	Trail Type: () Trail (x) Pathway		
		Valley Center Road from Woods Valley Rd. to Cole Grade Rd.	Trail Priority: (x) 1 () 2 () 3		
			Estimated Trail Length in Miles: 2.5 miles
